Electrical Supervisor

We are seeking an experienced Electrical Supervisor to oversee electrical installation and related works for the Villa Eden Resort Development Project. The successful candidate will supervise electricians and subcontractors, coordinate daily site activities, monitor quality and progress, and ensure electrical works are carried out safely and in accordance with approved drawings, specifications, and project requirements.

KEY RESPONSIBILITIES

- Supervise and coordinate all electrical installation works at the project site.
- Lead and allocate daily tasks to electricians, technicians, and electrical workers.
- Review electrical drawings, layouts, schematics, and specifications and ensure works are executed accordingly.
- Supervise installation of wiring, cables, conduits, lighting, power systems, distribution boards, panels, and other electrical systems.
- Monitor cable pulling, glanding, termination, testing, and commissioning activities.
- Coordinate electrical works with civil, plumbing, HVAC, and other MEP activities to avoid clashes and delays.
- Inspect completed works to ensure compliance with approved drawings, specifications, and required quality standards.
- Identify electrical issues, coordinate troubleshooting, and ensure defects are rectified promptly.
- Monitor daily manpower, work progress, materials, tools, and equipment requirements.
- Coordinate with project engineers, contractors, subcontractors, and other supervisors.
- Ensure electrical materials are properly stored and used efficiently.
- Maintain daily records of work progress, manpower, materials, and site issues.
- Ensure all electrical works are carried out in compliance with project safety procedures and applicable electrical standards.
- Conduct toolbox meetings and ensure workers follow proper PPE and safe working practices.
- Report delays, material shortages, technical issues, and other site concerns to the Electrical Engineer/Project Management.
- Assist with testing, commissioning, inspections, and handover of electrical systems.
- Perform other duties related to electrical works as assigned by the Project Management.

QUALIFICATIONS & EXPERIENCE

- Diploma, Certificate, or other relevant qualification in Electrical Engineering/Electrical Installation.
- Minimum 5 years of relevant experience, with at least 2 years in a supervisory role.
- Strong experience in electrical installation works for construction projects.
- Previous experience in resort, hotel, commercial building, or large-scale construction projects is an advantage.
- Good understanding of electrical drawings, installation methods, testing, and commissioning.
- Good knowledge of LV electrical systems, distribution boards, lighting, power distribution, and cable installation.
- Strong leadership, coordination, and problem-solving skills.
- Ability to manage electricians and coordinate with other trades.
- Relevant electrical license/certification will be an advantage.
- Willingness to live and work at a resort construction island/project site.
