

WE ARE HIRING

Powerhouse Operator

Noku Maldives by Vignette Collection is seeking a skilled and reliable Powerhouse Operator to join our Engineering team. This role is essential in ensuring uninterrupted power and fresh water supply across the resort by operating and maintaining generators, desalination plants, and related equipment safely and efficiently.

Key Responsibilities

- Operate and maintain power generators to ensure a continuous electricity supply throughout the property.
- Conduct regular inspections, troubleshooting, and preventive maintenance on mechanical systems.
- Operate and maintain desalination plants, monitoring water production and quality to meet resort demands.
- Maintain accurate logs of fuel consumption, energy production, and maintenance activities.
- Coordinate with external vendors for equipment servicing, repairs, and overhauls.
- Ensure compliance with all safety regulations and promote a safe working environment.
- Prepare operational and maintenance reports for management review.
- Support other engineering operations and assist in energy and water conservation initiatives.

Requirements

- Proven experience in power generation, water desalination, or mechanical maintenance.
- Strong technical knowledge of generators, desalination systems, and engineering equipment.
- Ability to troubleshoot, repair, and maintain mechanical systems.
- Familiarity with safety procedures and best engineering practices.
- Flexible to work rotating shifts, weekends, and public holidays.
- Previous experience in the Maldives resort industry is an added advantage.

Application Details

Only shortlisted candidates will be contacted.

Interested applicants are invited to submit their CV and certificates to: noku.hr@ihg.com
