Project Planning Engineer

We are seeking a Project Planning Engineer to establish and control project timelines through structured planning, sequencing, and progress monitoring. This role ensures proactive schedule management, improves delivery velocity, and restores control over project execution.

KEY RESPONSIBILITIES

- Develop and maintain detailed project schedules using Primavera or MS Project
- Map and integrate design, procurement, logistics, and construction sequences
- Identify and monitor the critical path on a weekly basis
- Prepare variance reports (planned vs. actual progress) with corrective action recommendations
- Implement and drive 4-week rolling look-ahead planning
- Coordinate with engineering, procurement, and site teams to ensure realistic sequencing
- Monitor resource loading and flag potential delays in advance
- Support management with schedule risk analysis and recovery planning

QUALIFICATIONS & EXPERIENCE

- 5–8 years of experience in project planning and scheduling
- Strong understanding of construction sequencing and site execution processes
- Proficiency in Primavera P6 and/or MS Project
- Experience integrating procurement and logistics timelines into master schedules
- Strong analytical and reporting skills
- Proactive mindset with the ability to anticipate and mitigate delays

Interested applicants may send their complete CV with ID/Passport copy, supporting documents and recent passport size photo to:
