Structural Engineer

We are seeking an experienced Structural Engineer to lead and oversee structural design validation and standardization for villa and coastal development projects. The role requires strong technical authority, independent judgment, and proactive review capability to ensure structural integrity, durability, and cost efficiency before site execution.

KEY RESPONSIBILITIES

- Review and validate all structural concepts prior to issuance to site
- Standardize beam-column grids, slab thickness criteria, and footing sizing templates for typical villa modules
- Develop and implement structural design standards and detailing guidelines
- Coordinate with external structural consultants where required while maintaining internal review authority
- Create and enforce a structural checklist before any drawing is finalized ("frozen")
- Ensure structural designs comply with durability requirements for saline and coastal environments
- Identify and mitigate potential structural risks before construction stage
- Support project teams with technical clarification and design optimization

QUALIFICATIONS & EXPERIENCE

- 8–12 years of experience in reinforced concrete structural design
- Proven experience in resort, marine, or coastal projects preferred
- Strong understanding of durability design in saline environments
- Technically assertive with the ability to challenge and improve design proposals
- Strong analytical, review, and decision-making skills
- Ability to work independently and maintain high technical standards

Interested applicants may send their complete CV with ID/Passport copy, supporting documents and recent passport size photo to:
